Berlin, 7.5.2026

Reference for applicant Manasi Acharya

Dear recruiting manager,

I am writing to express my recommendation of Ms. Manasi Acharya for a position at your organization. I work under Dr. Jackie Ma in the Applied Machine Learning group of the Artificial Intelligence Dept. at Fraunhofer-HHI, developing my doctoral thesis in the field of evaluation of machine learning models, with a special focus in healthcare applications. For the past two years I have been working closely with Ms. Acharya, supervising her work on supporting exploratory scientific activities in my research areas.

I hired her in the summer of 2024, for a software project focused on MLOps in an online microservice-based architecture. After that project was finished, she kept working under me in activities related to the tokenization of medical imagery, managing datasets and training models. She has shown great autonomy, successfully managing her own hybrid work schedule (in-office/remote), and has proven to be reliable while also independent, focused and dedicated, specially given that she kept a productive output in our department while concomitantly developing her master thesis at another institution. Ms. Acharya can clearly communicate and indepently interpret and reimplement methods found in the scientific literature, and has provided immense support in setting up repositories and ready-to-run environments, facilitating collaboration among the team. She has shown repeatedly to quickly learn newly presented machine learning-related concepts.

In an interpersonal level, our meetings have been pleasant and fluid, and at the same time polite and professional. She shows great curiosity and eagerness to try new things, and she engages in our discussion topics with calmness and clarity.

All in all, I believe Manasi Acharya has a great potential as a Machine Learning Engineer and as a good colleague, and I reiterate my recommendation to accept her in your organization. If you need any further clarifications, please don't hesitate to contact me.

Best regards,
Emílio Dolgener Cantú
